Company Confidential

PRODUCT AUTHENTICATION

Product Authentication at every stage using Supply Chain and Distributed Ledger Solutions.

Integration with Secure QR codes/NFC tags for user-friendly customer verification.

Tamperproof QR codes secured by Cryptography to authenticate any product before purchase.

Counterfeit alarms and notifications to the team if any Fraudulent products have entered the Supply Chain.

METaverse IN HEALTHCARE

Development of Blockchain and Metaverse-based use-cases using AR/VR and AI.

Focus on Doctor-Patient Consultations in a 3D virtual world with a completely immersive experience.

Creation of high-graphic avatars of Doctors and patients.

Web 3.0 ecosystem - Integration of Metaverse with Blockchain-based solutions.

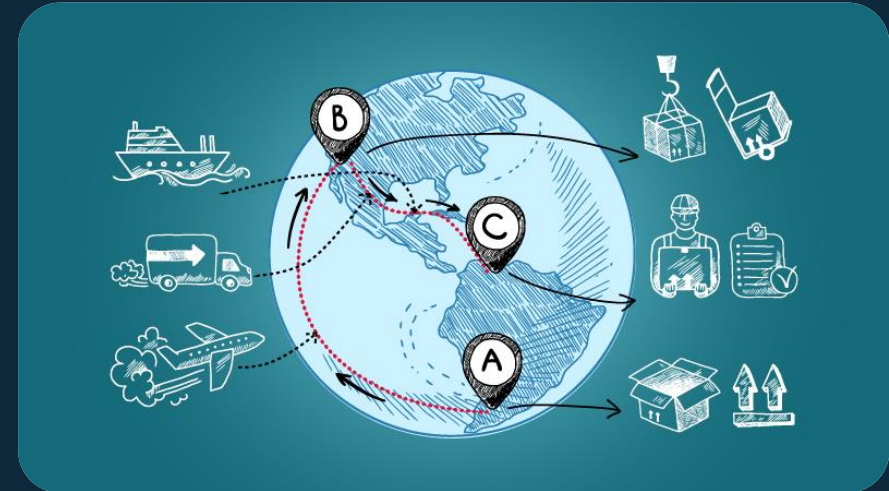

SUPPLY CHAIN MANAGEMENT

End-to-End tracking and tracing of products on the RICHMINT Distributed Ledger Technology.

Serialization of every unique product using Blockchain secured QR codes/NFC tags for easy and elegant last mile Authentication.

Access to the complete DLT for authenticated products to verify the whole Supply Chain of any product.

RICHMINT ENTERPRISE BLOCKCHAIN

Complete Richmint use-cases implementation on the RM blockchain

Cryptographic security, gas-free transactions and Intra-company private network make Enterprise Blockchain solutions private, robust and cost-efficient.

DLT Transparency and accessibility to approved personnel

REAL ESTATE CROWDFUNDING

Development of a complete Real Estate Crowd Funding platform on Blockchain

Reduced barrier to entry by introducing Tokenized Real Estate.

Fractionalization of Real Estate Property NFT into several Fungible tokens allowing fractional investing

Facilitating all payments in Crypto, thereby increasing transaction transparency.

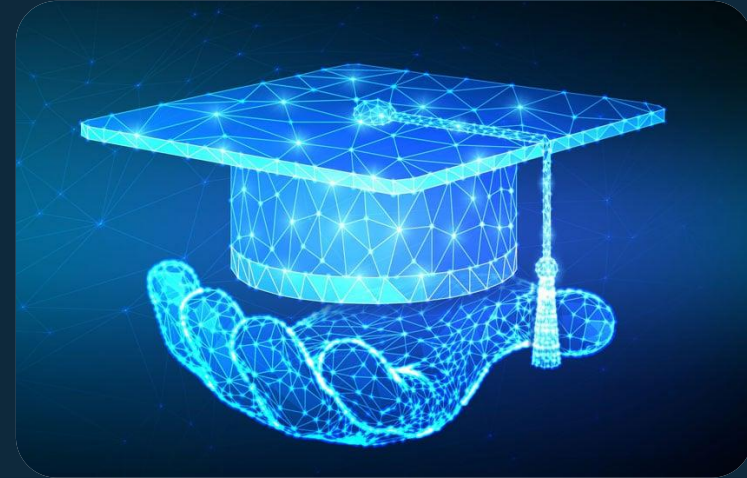

EDUCATION DIGITAL CERTIFICATES

E-KYC of all students and Faculty members on the Blockchain.

All Student Details and Courses recorded on each Student's distributed ledger, empowering them to own their own data.

Efficient use of DL Technology to store Validated student Credentials, Degrees, and Diplomas on Blockchain.

GOVERNMENT RECORDS

Complete End-to-End DLT solutions to record important data & financial transactions on Blockchain using Cryptography.

Land registrations, Revenue Records, employee personal information, upcoming projects, Funding, etc.

Completely eliminate issues of fraudulent registrations, hidden transfers of fiat money, and corrupt data transfers.

Adding complete transparency and accessibility of records that last on the network forever.

RICHMINT EXCHANGE

Fully-fledged global exchange for trading of Cryptocurrencies or Fiat money in an elegant but user-friendly way

High speed trading engines, robust multi-layer security, Hot & cold Wallets

Fully developed Android and iOS applications for easier trading

ASSET-BACKED TOKENS (Stable Coin)

Assigning Richmint coin a stable value by backing it to Real-world assets.

The tokens can be backed by Commercial real estate, iron ores, gold, etc.

Securely maintained ledgers to ensure Stable value of Richmint Stable tokens at all times.

ESG COMPLIANCE

Carbon Footprints Validation.

Net-Zero tracking on Blockchain assigning Richmint coin a stable value by backing it to Real-world assets.

Comprehensive assessments of Companies using Carbon Risk Ratings.

Third-party certification of ESG Compliances.
